

Partner with GCI and Luxar Tech

From Network Packet Brokers to Software-Defined Visibility Platform

Meet Luxar Tech

GCI's converged distribution and services model offers its solution provider community a unique opportunity to leverage high growth technologies and to partner with some of the hottest vendors within these segments – **Luxar is one such vendor.**

Facilitating Network Monitoring

Enabling Cost-Effective Network Monitoring

Luxar Network Packet Brokers (NPBs) enable optimal access and visibility into network traffic for a variety of network monitoring, security, and acceleration tools.

Enabling Pervasive, Hyperscale Network Monitoring

Luxar's software-defined visibility platform enables building scalable traffic analytics farms. The platform has integrated open-networking SDN and NPBs, proven with deployments in production networks since 2015.

Enabling Migration from NPBs to Scalable Visibility Platform

Luxar NPBs' design goals include cost-effectiveness and a migration path from a small deployment of NPBs to a completely software-defined visibility infrastructure. The NPBs are SDN-ready and readily fit into Luxar's SDN-based visibility platform.

Supporting Partners and Customers

Luxar, headquartered in Fremont, California, develops industry-leading network visibility solutions for service providers and enterprises. Luxar offers products from network taps and Network Packet Brokers (NPBs) to SDN-based hyperscale visibility platform.

Luxar is ready to collaborate with GCI partners and respond to your customer needs. Not just a product supplier, we are frequently involved in solving customer problems in network visibility, providing cost-effective solutions, customizing software and hardware, and bringing in technology ecosystem partners when needed.

Contact your GCI team today about growing your network monitoring business with Luxar.

Grow your Networking Business with Luxar Tech:

- Leveraging standard and/or open technologies where possible to bring about cost-effectiveness and interoperability
- Offering lucrative margin potential and add-on revenue opportunity with IT service solutions
- Providing customer-focused, responsive support service and addressing customization needs
- Well connected with technology ecosystem partners and able to offer complete solutions on demand

Become a major force in Luxar's overall go-to-market strategy, and help differentiate yourself from your competition!
